

MUHAMMAD ARHAM KHAN

Full Stack Engineer • React.js • Python (Django / FastAPI) • REST APIs

Karachi, Pakistan • karham937@gmail.com • [linkedin.com/in/arham-khan-dev](https://www.linkedin.com/in/arham-khan-dev) • github.com/MuhammadArhamKhan-Dev • muhammadarhamkhan.vercel.app

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Flexbox, Responsive Web Design, Component-Driven Architecture

Backend: Python, Django, FastAPI, Flask (familiar), RESTful API Design & Integration

Databases: PostgreSQL (learning), REST API data handling, JSON

AI Integration: LangChain, OpenRouter, Agentic AI, LLM orchestration

UI / UX: Figma, user-first design, usability-focused interfaces, collaboration with designers

Tools & Practices: Git, GitHub, VS Code, Vercel, Netlify, Render, code reviews, documentation

PROJECTS

AI LangAssist — React.js, FastAPI, Python, LangChain, OpenRouter [\[Live\]](#) [\[GitHub\]](#)

- ▶ Designed and built a full-stack AI language assistant — React.js frontend, Python FastAPI backend, LangChain for LLM orchestration — integrating front end and back end via RESTful APIs.
- ▶ Implemented scalable server-side logic in Python with clean separation of concerns, and deployed the full application stack on Vercel.
- ▶ Designed an intuitive, responsive UI with seamless async communication, prioritizing user experience throughout.

Countris — REST API Countries Explorer — React.js, REST APIs, JavaScript [\[Live\]](#) [\[GitHub\]](#)

- ▶ Built a React.js SPA with search, filter, dark mode, and client-side routing — consuming and integrating a public RESTful API throughout.
- ▶ Applied component-driven architecture and responsive design, ensuring consistent performance across devices.

Thread — Clothing Brand Website — HTML5, CSS3, JavaScript [\[Live\]](#) [\[GitHub\]](#)

- ▶ Developed a fully responsive brand frontend — hero, product cards, pricing — applying UI/UX principles including visual hierarchy and cohesive design language.

EXPERIENCE

Full Stack Developer (Collaborator) | Independent Project

Dec 2025 – Mar 2026

- ▶ Developed responsive user interfaces in JavaScript and built a Django web application with authentication, session management, and server-side rendering.
- ▶ Wrote clean, modular code across the frontend layer and maintained code integrity using Git for version control.
- ▶ Built interactive data visualizations using JavaScript and Chart.js, and collaborated using Git for asynchronous team coordination.

EDUCATION

B.E. Computer & Information Systems Engineering | NED University of Engineering & Technology
2023 – 2027

- ▶ CGPA: 3.38 / 4.00 | Relevant coursework: Data Structures, Algorithms, Database Systems, Software Engineering

A NOTE ON EXPERIENCE

I am an undergraduate developer with hands-on project experience across the full stack — React.js, Python, Django, FastAPI, and RESTful APIs. While I am still building towards 3+ years of professional experience, my projects are live, production-deployed, and demonstrate real full-stack capability. I am a fast learner, detail-oriented, and ready to contribute from day one.
